• Autonomous University of Aguascalientes

"Intelligent Computing Engineering"

Artificial intelligence & software development

08/2016 - 08/2021

REPOSITORIES & PLATFORMS

<https://github.com/Ramses2119998>

<https://g.dev/Ram-Dev-Google>

INTERNSHIP

Face Recognition

UAA, Aguascalientes, Mexico

Python Developer

02/2020 - 06/2020

- Development of a project to identify faces in a training carried out in python with the help of the OpenCV library.
- OpenCV has more than 2500 optimized algorithms, which includes a comprehensive set of both classic and state-of-the-art computer vision and machine learning algorithms.

Software-UAA-PROT

UAA, Aguascalientes, Mexico

Full Stack

02/2020 - 06/2020

- Development of a software for the analysis of biological viruses. In the case of the project, work was done with the coronavirus.
- The development was mounted on a web page using node.js technologies for the backend and for the frontend .ejs (Embedded JavaScript Templating) was used in order to generate HTML.

PERSONAL PROJECTS

Mobile Apps

California, United Estate

I am currently working on a project that is planned to be tested in Los Angeles, Orange & San Bernardino County counties.

UX - UI Designer

10/2021 - Present

- UX & UI designer for mobile applications looking for the best experience, with the fewest number of screens.

Front End Developer

01/2022 - Present

- Front end developer for web applications and mobile applications using the React.JS framework

OTHER

React-Native

- I started a course to learn how to use React-Native for mobile applications, taking into account the advantages when it comes to moving faster when developing multi-platform mobile applications.

Student in Google Devs

- I started studying on the google devs platform to learn about the Kotlin programming language, google offers a complete preparation by units to understand and master the development environment.
